Continuation of 5 Other: Response to the election of species requirement: The applicant was required to elect between embodiments of figure 2 and 3.

Figure 2 is a protective cage according to one embodiment of the invention.

Figure 3 is a protective cage according to a second embodiment of the invention

The species are independent or distinct because the continuous gap 18 opens to a hole 24 and to the outside, runs between the rear ring 16 and the protective ring 12, the opening of gap 18 to the outside extends into the tubing insertion location 22 whereas the second embodiment the front side of cage 10 is completely closed and the pump wheel 6 is completely covered by the front side of cage 10.

Applicant admits in the response that Claim 1 specifies "a stationary protective ring (12) surrounding the entire circumference of the pump wheel (6) at the front side of the wheel." There is a protective cover present in claim 4 as seen in figure 3 which is a different embodiment of the invention. As the applicant denoted the protective ring is also present in the embodiment of Fig. 3, which is covered by claim 4. Applicant further points the difference between the embodiments of the two figures "The only difference is that the embodiment of Fig. 3 additionally comprises a front plate which covers the front side of the pump wheel (6), as defined in claim 4". Applicant's statement "Since claim 4 is dependent on claim 1, claim 1 covers the embodiment of Fig. 3, as well as Figs. 1 and 2" is non-responsive because claim 4 is still directed to embodiment of figure 3 and because claim 4 depends from claim 1 does not make claim 1 cover embodiments 1 and 2 (figure 3).

Applicant's statement that "In the event that the Examiner maintains the species election, Applicant provisionally elects the embodiment of Fig. 2 (also shown in Fig. 1). Applicant submits that all of the claims read on the embodiment of Figs. 1 and 2, although claim 4 also reads on the embodiment of Fig. 3" is non-responsive as it contradicts itself. To further clarify, applicant elects embodiment 1 (figure 2), admits that claim 4 refers to second embodiment (figure 3) and still submits that all the claims read on first embodiment.
